

Star Hot Dogs Steamer Instructions

(Steamin' Demon)

1. Place the machine on a sturdy, level surface.
2. Add water to the lower level to just below the metal lip of the basin. Ensure the heating element is fully covered. Using hot water will reduce heating time.
3. Plug unit in to an appropriate power supply (no GFI circuits).
4. Place hot dogs in the left compartment, arranging them to allow for circulation of steam.
5. Place buns in the right compartment.
6. Turn the switch to "ON" and adjust the thermostat control between "LOW" and "HIGH" to your preference.
7. Keep the lids closed when not serving.
8. Add more water as necessary to maintain the water level.

If you experience any difficulties with the equipment, call Celebrations immediately at 360-754-7368 for assistance.
